Education

Master in Mathematical Engineering 2016 2017
Universidad Complutense de Madrid (UCM) 7.26/10

Degree in Computer Engineering 2011 – 2016
Universidad Autónoma de Madrid (UAM) 8.68/10

Degree in Mathematics 2011 – 2016
Universidad Autónoma de Madrid (UAM) 7.54/10

Personal projects

- **Elasticsearch containerized cluster:** It creates custom images for Elasticsearch and deploys them in clusters using Docker, Kubernetes, Terraform, and AWS.
- **Monitoring tool:** Monitoring cpu and memory consumption by system processes with nmon and python.
- **Portfolio website:** Built with Angular, typescript, and scss. It is easily customizable to add new sections and projects.
- **Bachelor's thesis – Tumor growth simulation model:** Model for simulating tumor growth in collaboration with the Faculty of Medicine at UAM, using technologies such as C++ and R.

Languages

- Spanish: native
- English: C1 (studying to reach C2)

About Me

Full Stack Developer with 8 years of professional experience. Native Spanish speaker with a C1 level of English.

I work as part of a 15-person development team and occasionally step in as coordinator when the main lead is unavailable. I serve as the architect and maintainer of Elasticsearch clusters and its Kibana interface. I also participate in the design and development of new features across our platform.

Currently seeking new opportunities in international teams, with a strong interest in expanding my skills in cybersecurity and AI/ML

Experience

Full Stack Developer

Lynx Tech (Financial Crime)

Remote

Jan 2023– currently

Lynx is a new company that emerged from ADIC – IIC. At this company, critical software is developed for banks, operating in Near Real Time with a response time of less than 100ms. It also includes a web application used for product management and data visualization, along with storage in both relational and non-relational databases. Among my main responsibilities:

- Responsible for architecture and sizing of Elasticsearch (and Opensearch) clusters for our customers and managing their Kibana (and Opensearch Dashboards) web interfaces.
- Backend developer of the described product, taking on the role of coordinator in the absence of the main coordinator.
- Main product lead for one of the clients, handling email management, applying fixes, new features, and maintenance in a Linux (RedHat) environment.
- Part of the team responsible for migrating the product to the cloud (AWS)
- DevOps application – CI/CD for the software, performing unit tests and continuous integration.

Technologies used: Elasticsearch, Opensearch, Kibana, Python, C, Bash, Docker, Kubernetes, Terraform, AWS, Typescript, NodeJS, CI/CD (Pytest, Google Test, Sonarqube, Jenkins).

Software analyst

Instituto Ingenieria Conocimiento (IIC)

Madrid, Spain

May 2017– Jan 2023

I worked as a developer in a team that maintained and enhanced a critical product for banks (Lynx, as explained earlier). My main responsibilities included:

- Developing backend improvements and new features for the product in a Linux (Red Hat) environment.
- Maintaining Elasticsearch clusters for both the company and its clients.
- Acting as part of the team responsible for a major client, managing email communication and participating in meetings about potential requirements and issues.

Technologies used: C, C++, Python, Bash, Awk, ElasticSearch, Kibana, SQL, Linux, Git, REST, SOAP.

Skills

- **Programming languages or frameworks:** C, Python, Bash, awk, Typescript, Angular, C++, HTML, CSS, SQL
- **Software and other technologies:** Elasticsearch, Opensearch, Kibana, AWS, docker, Kubernetes, Terraform
- **CI/CD tools:** Gitlab, Gitlab Pipelines, Github, Sonarqube, Jenkins, Pytest, Google Test
