Professional Summary

Full Stack Developer with 8 years of professional experience. Native Spanish speaker with a C1 level of English.

I work as part of a 15-person development team and occasionally step in as coordinator when the main lead is unavailable. I serve as the architect and maintainer of ElasticSearch clusters, as well as a developer of custom Kibana plugins used to analyze large transactional datasets. I also lead the design and development of new features across our platform.

Currently seeking new opportunities in international teams, with a strong interest in expanding my skills in cybersecurity and AI/ML

Work Experience

January 2022

Current

Full Stack Developer at Lynx (Lynx Financial Crime Technology) full remote, Spain

Lynx (formerly ADIC - IIC). Gradually introducing new ones:

- Applying DevOps - CI/CD to the software, implementing unit tests and continuous integration.
- As part of a team that is migrating the product to the cloud.
- Occasional coordinator of a 15-person development team

Technologies used: Same as previous job + TypeScript, JavaScript, Angular, GitLab, Pytest, Google Test, Jenkins, Docker, AWS, Azure,

May 2017

December 2022

Software Engineer at ADIC - IIC (Instituto de Ingeniería del Conocimiento) in Madrid, Spain

Developer in a team that maintains and enhances a critical product for banks. This software operates in Near Real Time with a response time of less than 100ms. Additionally, it is associated with a web interface used for product management and data visualization, along with storage in both relational and non-relational databases. Some of my responsibilities were:

- Backend developer for the described product, implementing new features and improvements.
- Architect and maintainer of ElasticSearch clusters for both the company and our clients.
- Primary contact in dealings with one of the clients, managing email communication and meetings regarding potential requirements and issues.

Technologies used: C, C++, Python, Bash, Awk, ElasticSearch, Kibana, SQL, Linux, Git, REST, SOAP

October 2015

May 2017

Intern in ADIC, personal projects and thesis in Madrid, Spain

I worked on various endeavors:

- Intern at ADIC as a data analyst, using technologies such as R, Shiny, and Java.
- Master's and Bachelor's degree final projects: Developed a model for simulating tumor growth in collaboration with the Faculty of Medicine at UAM, using technologies such as C++ and R.

Programming Skills

Languages

Advanced: C, Python, Bash, Python, SQL

Medium: C++, Typescript, Javascript (Angular), REST, MQ, Docker, Kubernetes, Java, Awk, PHP, HTML, CSS, LaTeX, R, NodeJS, Prolog, Matlab,...

Software

Linux, ElasticSearch, AWS, Azure. PyTest, Google Test, RedHat, Kibana, Git, Jenkins, Vim, VS Code, Excel, Google Sheets,

Future goals and objectives

- Move into management or coordination roles of development teams.
- Interested in working and deepening my knowledge in AI/ML and cybersecurity.

Education

- **Master in Mathematical Engineering** at Universidad Complutense de Madrid. GPA: 7.26 / 10
- **Degree in Computer Science** at Universidad Autónoma de Madrid. GPA: 8.68 / 10
- **Degree in Mathematics** at Universidad Autónoma de Madrid. GPA: 7.54 / 10
